PROFESSIONAL SUMMARY

A software engineer with a strong background in mobile application development and user interface design. Proven ability to lead projects from conception to implementation, with a focus on creating user-friendly and innovative solutions.

EDUCATION

University of Twente **Enschede, Netherlands**
MSc. Interaction Technology **Expected Date of Graduation: 2028**

Ashesi University **Berekuso, Eastern Region**
BSc. Computer Science **Sept 2020 - Aug 2024**

ACHIEVEMENTS/AWARDS

Delta Innovation Camp (1st place), Academic City **June 2023**
Accenture Product Design Experience Certificate Holder **March 2023**
***Dean's List Honors**, Ashesi University **2020 - 2021**

WORK EXPERIENCE

Margins Group – The Octagon, Accra Central **Sept 2024 – Oct 2025**

National Service Personnel – Software Development and Systems Integration

- Built a secure administrative dashboard (Project Citadel) in Java EE8 and React, presenting transaction history, account state, and operational reports for microcredit institutions, with biometric verification on sensitive actions.
- Implemented role-based access control and institution-branch hierarchies, organizing data flows across multiple institutional levels into a single coherent interface.

Cross Switch Ghana – Osu, Accra

July 2023 - Aug 2023

Flutter Developer Intern

- Spearheaded API integration and mobile frontend development of a fintech application that streamlined fiscal transactions and simplified company package selection.
- Orchestrated the design process for the mobile and web versions of the application in collaboration with the product designer, utilizing Figma and Photoshop to create a visually intuitive and appealing user interface.

PROJECTS AND RESEARCH

ExpressMed Telemedicine, Ghana **Jan 2023 – Present**

Flutter Developer and Interface Implementation Lead

- Rebuilt patient, doctor, and admin Flutter applications across three distinct user roles, handling appointment booking, patient management, and schedule data flows, supported by Figma prototypes.
- Led the Angular redesign of the ExpressMed website, integrating appointment booking, package selection, and health support features into a unified patient-facing interface.

Ashesi University College, Berekuso

Jan 2024 – Aug 2024

Thesis Research: Leveraging Machine Learning for Precision Medicine in Ghana

- Built a Python/Streamlit research dashboard for interactive exploration of ranked drug-disease predictions, designed in consultation with the supervisor to support actual research use.
- Implemented the supporting ML pipeline over a biomedical knowledge graph: data preprocessing, node2vec embedding training, cosine-similarity ranking, and evaluation of predicted relation types.

CO-CURRICULAR ACTIVITIES

Ashesi University, Ashesi Design Lab (D:Lab)

Feb 2021 – Dec 2023

Photography and Videography lead

- Curated visual content (posters, videos, and photographs) for club events, leading to increased club publicity and membership growth.
- Crafted stories and content for the D:Lab's social media platforms, aimed at increasing awareness and engagement both within and beyond the school community.

SKILLS

- Mobile & Frontend: Flutter, React, Dart, HTML/CSS
- Data Science & Research Tools: Python (pandas, numpy, scikit-learn, Streamlit), Jupyter
- Design & Prototyping: Figma, Photoshop, Canva, Lightroom
- Other: Rapid prototyping, HCI, multidisciplinary team communication

***Dean's List Honors** – Awarded to students with a GPA of 3.5 and above
